TypeScript

JOB EXPERIENCE

ponds/ Full Stack Developer

Project Summary:

In 2020, I spearheaded the development of a website and application for the Environmental Organization of Iran, focusing on Fars province. The app highlights wetland information and navigation routes, authored by a teammate. I led the creation of an admin panel using Next.js and Express, serving various admin roles with insights into user and staff data. Admins configure environmental data, including user paths in wetlands.

Role:

Web Developer, handling frontend and backend tasks.

Tech Stack:

- Frontend: Next.js
- Backend: Express
- Database: MongoDB

speech noise / Full Stack Developer

Project Summary:

Developed a website and Android app in 2023 for a specialized Speech Therapy doctorate. The app displays admin-created audio/video questions, user interactions are tracked, and detailed reports are showcased in the admin panel. I handled all aspects of the project, using Unity for the mobile app and Next.js for frontend and backend.

Role:

Web and Mobile App Developer

Tech Stack:

- Frontend: Next.js
- Mobile App: Unity
- Database: MongoDB

eco game / Full Stack Developer

Project Summary:

In 2021, I independently developed a website and Android app for the Environmental Organization of Iran, focusing on Kohgiluyeh and Boyer-Ahmad province. The project involved displaying admin-created questions in the Android app for user interaction. I handled all aspects, from building the mobile app with Unity to developing the frontend and backend using React and Express.

Role:

Web and Mobile App Developer

Tech Stack:

- Frontend: React
- Backend: Express
- Mobile App: Unity
- Database: MongoDB
